

AUSTRALIAN ALLIANCE FOR CELL AND GENE THERAPY

An 'end to end' solution for cell and gene therapies in Australia

The Australian Alliance of Cell and Gene Therapy (AACGT) is a platform providing a single touch point for comprehensive delivery of your cell and gene therapy solutions. The alliance partners each have complementary domain expertise within the cell and gene therapy value chain and an extensive network of partners to provide a complete service including:

- Proof of concept, product development, pilot manufacturing and pre-clinical expertise
- Manufacturing and product delivery
- Clinical trials expertise
- Commercialisation expertise

ALLIANCE PARTNERS

- Access to a network of universities and research organisations with the relevant capabilities, translation focus and infrastructure (clean rooms)
- Fostering high quality research to solve industry challenges through development of advanced biomaterial coatings; including the design, proof of concept, product development and pilot-scale manufacturing of biomaterial products (TekCyte)

- Premier site for medical research and clinical trials
- Smooth start to clinical trial with a highly competitive timeline to gain ethics approval (Research Valet)
- Access to Aikenhead Centre for Medical Discovery (a hospital-based bio-engineering innovation hub)

- Manufacturing to global standards and maintaining global consistency
- Product delivery (integration into clinical sites and "needle to needle" supply chain)
- Apheresis site management securing highest quality starting material
- TGA License for manufacture of CAR-T therapies (including apheresis, cryopreservation and flow pathology)

- Access to a proven commercialisation model
- Connectivity into the CCRM global network that taps into a consortium of world-leading regenerative medicine companies
- Strong link to industry trends and needs through the industry consortium
